

RPAVAULT — ADVANCED TRACK

BEYOND RPA.

Most “advanced” UiPath courses stop at IXP. **This one starts there** — and ends at MCP servers, coded agents, and Maestro orchestration.

MODULES

03

PHASES

100%

HANDS-ON BUILD

Most RPA developers are still training for the UiPath platform of two years ago.

Document Understanding. Basic AI Center. Maybe a REST call, if they're lucky. That's where most "advanced" curricula stop — right where the real platform begins.

Meanwhile UiPath shipped Autopilot, Healing Agents, ScreenPlay, Agent Builder, MCP Servers, Coded Agents, and Maestro — an entire agentic layer built on top of classic RPA. **The developers who learn it first aren't competing for jobs. They're choosing them.**

This track is built for working RPA developers, not absolute beginners. Every session is hands-on — you build the same Document Understanding pipelines, agents, and MCP integrations that ship in production, guided directly by RPAVAULT mentors instead of pre-recorded slides.

35 sessions. Three phases. One destination: agentic.

WHO THIS IS FOR

- UiPath developers who have shipped at least one production workflow
- RPA / CoE professionals who want first-mover skills in agentic automation
- Anyone who reads this curriculum and feels the gap, not the mystery

WHAT YOU'LL NEED

- Working knowledge of UiPath Studio
- No prior AI / ML background required — it's taught from first principles
- A willingness to build in every session, not just watch

Three phases. One progression.

Each phase builds on the last — foundations you'll actually use inside the agentic workflows that follow, not theory you'll forget by Phase 03.

PHASE 01

Days 1-11 · 5 Modules

Document Intelligence & Process Foundations

Where most “advanced” UiPath courses stop. DU frameworks, AI Center model training, human-in-the-loop validation, REST APIs, and Intelligent Xtraction — the foundation everything agentic gets built on.

Document Understanding & Real-Time Use Case · AI Center · Human-in-the-Loop (HITL) · API Workflows · Intelligent Xtraction & Processing (IXP)

PHASE 02

Days 12-17 · 1 Module

Advanced AI Inside UiPath

The features most working developers haven't touched yet. Gen AI activities, Autopilot, Clipboard AI, Healing Agents, ScreenPlay, and Semantic Activities — the platform's newest AI layer, end to end.

Advanced AI

PHASE 03

Days 18-35 · 6 Modules

Agentic Automation & Orchestration

Where this track actually separates you from the market. Agent Builder, prompt engineering, MCP servers, coded agents, Maestro orchestration, and external agent frameworks — built, deployed, tested.

Agentic AI · MCP Server · Coded Agent · Coding Agent Skills · Maestro & BPMN Workflow · External Agent

Document Intelligence & Process Foundations

Where most “advanced” UiPath courses stop. DU frameworks, AI Center model training, human-in-the-loop validation, REST APIs, and Intelligent Xtraction — the foundation everything agentic gets built on.

DAY 01-05**Document Understanding & Real-Time Use Case****DAY 01****Document Understanding Fundamentals**

1 HR

- What is Document Understanding?
- Why DU is needed in RPA
- Structured vs. semi-structured vs. unstructured documents

DAY 02**DU Framework**

1 HR

- Stages in DU — Taxonomy, Digitization, Classification, Extraction

DAY 03**DU — Practical Demo**

1.5 HR

- Invoice processing use case
- End-to-end implementation
- Testing and debugging

DAY 04**Studio DU Template**

1 HR

- Introduction to the DU framework in Studio

DAY 05**Introduction to Modern DU**

1 HR

- Traditional DU vs. Modern DU
- Modern projects
- Out-of-box document types
- Benefits of Modern DU

DAY 06**AI Center****DAY 06****AI Center Fundamentals**

1 HR

- AI Center overview
- Training ML models
- Consuming ML models in Studio

DAY 07

Action Center & HITL

1 HR

- Human validation concepts
- Create validation actions
- Complete validation tasks
- Business scenarios

DAY 08

Validation Station Deep Dive

1 HR

- Present Validation Station
- Confidence scores
- Exception handling
- Validation best practices

DAY 09

API Workflows

DAY 09

API Workflows

1 HR

- API introduction
- REST APIs
- API activities
- Business use cases

DAY 10-11

Intelligent Xtraction & Processing (IXP)

DAY 10

Introduction to IXP

1 HR

- What is IXP?
- Why IXP is needed
- IXP vs. traditional extraction
- Business use cases

DAY 11

Demo — IXP

1 HR

- Real-time use case

Advanced AI Inside UiPath

The features most working developers haven't touched yet. Gen AI activities, Autopilot, Clipboard AI, Healing Agents, ScreenPlay, and Semantic Activities — the platform's newest AI layer, end to end.

DAY 12-17**Advanced AI****DAY 12****Gen AI Activities**

1 HR

- Introduction to Gen AI
- Real-time use case

DAY 13**Autopilot for Everyone**

1 HR

- Introduction to Autopilot for Everyone
- How to use it in Studio
- Business use cases

DAY 14**Clipboard AI**

1 HR

- Introduction to Clipboard AI
- How to use Clipboard AI
- Business use cases

DAY 15**Healing Agent**

1 HR

- Introduction to Healing Agent
- How to use Healing Agent
- Business use cases

DAY 16**ScreenPlay**

1 HR

- Introduction to ScreenPlay
- How to use ScreenPlay
- Business use cases

DAY 17**Semantic Activities**

1 HR

- Introduction to Semantic Activities
- How to use Semantic Activities
- Business use cases

Agentic Automation & Orchestration

Where this track actually separates you from the market. Agent Builder, prompt engineering, MCP servers, coded agents, Maestro orchestration, and external agent frameworks — built, deployed, tested.

DAY 18–25

Agentic AI

DAY 18

1 HR

Agentic AI Fundamentals

- Introduction to Agentic AI
- Agent vs. traditional automation
- UiPath Platform — Agent Builder

DAY 19

1 HR

Agentic AI Concepts

- All agentic concepts in Agent Builder

DAY 20

1 HR

Prompt Engineering

- Prompt engineering and its types

DAY 21

1 HR

Build Your First Agent

- Building a real-time use case
- Agent configuration
- Instructions, inputs & outputs
- Testing the agent

DAY 22

1 HR

Agent Escalations (HITL)

- Human validation
- Escalation scenarios
- Approval workflows
- Action Center integration

DAY 23

1 HR

Agent Evaluations & Agent Score

- Introduction to agent evaluations and types

DAY 24

1 HR

Agent Tools & Context Grounding

- Why evaluate agents?
 - Evaluation metrics & Agent Score
 - Testing scenarios
 - Performance monitoring
-

DAY 25

1 HR

Agent + RPA Integration

- Calling an agent from RPA
-

DAY 26-30

MCP Server

DAY 26

1 HR

Introduction to MCP Server

- What MCP is and why it matters for agents
-

DAY 27

1 HR

UiPath MCP Server

- Practical demo on UiPath MCP Server
-

DAY 28

1 HR

Coded MCP Server

- Practical demo: Coded MCP using Python + UiPath
-

DAY 29

1 HR

Command MCP Server

- Practical demo on Command MCP
-

DAY 30

1 HR

Remote MCP Server

- Practical demo on Remote MCP
-

DAY 31

Coded Agent

DAY 31

1 HR

Introduction to Coded Agent

- Introduction to Coded Agent
 - Build a Coded Agent using Python
 - How to deploy a Coded Agent in UiPath
 - Practical use case
-

DAY 32

Introduction to Coding Agent Skills

1 HR

- Introduction to Coding Agent Skills
 - Build an RPA workflow using a coding agent (Claude, Codex)
 - Deploy the RPA workflow using a coding agent
-

DAY 33-34

Maestro & BPMN Workflow

DAY 33

Introduction to Maestro & BPMN Workflow

1 HR

- Introduction to BPMN
 - How to create a BPMN flow in Maestro
 - What are tasks, events, and gateways?
-

DAY 34

Demo — Maestro

1 HR

- Demo on a full Maestro flow
-

DAY 35

External Agent

DAY 35

Calling External Agents

1 HR

- Introduction to external agents (using CrewAI)
 - Demo on external agents using CrewAI
-

WHAT'S INCLUDED

Built to be used, not just watched.

01

Live, instructor-led sessions —
not pre-recorded slides

02

Hands-on build in every
session: DU pipelines, agents,
MCP servers, Maestro flows

03

Lifetime access to session
recordings

04

Direct mentor access for
doubts and code review

05

Private practitioner community
of working RPA developers

06

Certificate of completion

Ready to close the gap?
